Ultra-fast home networking made easy with Belkin's new Gigabit Powerline HD Adapters

- **First to market at Gigabit speeds of up to 1000Mbps*, Belkin's Gigabit Powerline Adapters allow you to quickly transfer large data files as well as stream multiple HD movies online**
- **PC gamers can rely on the stability of Gigabit Powerline, which reduces online gaming latency**

(Rushden, UK) 1 Sept, 2009 - The latest addition to Belkin's high performance Gigabit networking portfolio, the new Gigabit Powerline HD Adaptor, allows you to create an ultrafast HD entertainment network through your home's existing electrical wiring. Powered by [Gigle](#) Semiconductor's mediastream™ chip, Belkin's Gigabit Powerline provides a secure, stable networking signal anywhere in the home—even for areas that are hard to reach with wireless connections.

Gigabit networking offers the fastest transfer speeds currently available and with many of the devices in our home's now supporting Gigabit networking, Belkin's new Gigabit Powerline will allow you to transfer your data between 4 and 5 times faster than standard network speeds.

Because of its Gigabit speeds and consistent connection, Gigabit Powerline reduces online gaming latency and provides greater bandwidth, making it ideal for online PC gaming and ultrafast high-quality transmission of multiple video streams. While the current fastest powerline technology runs at 200Mbps, Gigabit Powerline delivers content at speeds of up to 1000Mbps.

Used in conjunction with Belkin's new high performance Gigabit switches, Gigabit Powerline delivers the fastest networking speeds allowing you to make the most of your home entertainment set-up, connecting devices such as your X-Box or Play Station for high speed gaming, and your HDTV, set-top box and Blu-Ray Live.

To complete the Gigabit portfolio, Belkin's Gigabit USB 2.0 Network Adapter allows your notebook or desktop computer to connect to a gigabit network. The Gigabit USB 2.0 Adapter allows your computer to share large files over your network quickly and reliably. It can easily be plugged into the USB port of your laptop or desktop PC. USB 2.0 speed at 480 Mbps transferred into GIG speed at 1000 Mbps.

With simple plug-and-play connectivity setting up a powerline network is easy.

- Plug one end of the adapter into an available wall socket
- Connect the other end to any device with an available Ethernet port (RJ45), such as a gaming console, set-top box, or computer.

Gigabit Powerline HD Starter Kit (F5D4076uk) - £129.99/ €149.99

- Ideal for ultrafast high-quality transmission of multiple video streams, reducing online gaming latency and quickly transferring large data files
- Includes one single-port adaptor for a gaming console, HDTV, or a computer and another single-port adaptor to plug into a router or modem router
- Stream multiple HD movies and game online
- Improves Internet connectivity in remote rooms or places hard to reach with wireless connections
- Provides a secure, stable networking signal
- Push-button security
- Plug-and-play setup
- Mesh network:
 - Adding a third (or more) Belkin Powerline Adapter enables Gigle's xtendnet™ feature that provides increased networking stability and performance by creating a transparent mesh network.
- Compatible with HomePlug® AV products

10/100/1000 Switch, 8-Port (F5D5141-8) - £59.99/€59.99**10/100/1000 Switch, 5-Port (F5D5141-5) - £39.99/€39.99****Gigabit USB 2.0 Network Adapter (F5D5055ea) – £27.99/€39.9****AVAILABILITY:** Available in Europe now

*NOTE: The standard transmission rate—1000Mbps—is the ideal physical data rate. Actual data throughput and distance will be lower, depending on interference, network traffic, building materials, and other conditions.
