## Belkin launches revolutionary new TuneBase FM with Hands Free, the first FM transmitter with hands free calling

- ***Talk on your iPhone and answer calls, hands-free***
- ***Listen to music from your iPhone or iPod while it charges***

**(Rushden, UK)** – 2 July, 2009 – Belkin’s unique new in car FM solution TuneBase FM with Hands Free is the first FM transmitter to enable you to call hands free, listen to, and charge your iPhone while you’re on the move.

TuneBase FM with Hands Free automatically fades music out as a call comes in allowing you to pick up calls with one touch of a button. An embedded microphone allows you to talk on your iPhone hands free and listen to calls through your car’s stereo speaker system.

With ClearScan technology, TuneBase FM with Hands Free will search for the best FM frequency and the one touch controls allow you to play, pause, rewind or fast forward your music, minimising driver distraction while providing the best quality sound. The patented adjustable cradle holds any iPod or iPhone and can be flipped horizontally allowing you to view maps on the iPhone’s GPS feature.

TuneBase FM with Hands Free is also one of the few FM transmitters with an additional USB power out feature allowing you to charge a second device.

For newer cars with an auxiliary input jack the new TuneBase Direct with Hands Free allows you to get the best possible sound quality by plugging your iPhone or iPod directly into your car’s stereo using a 3.5 mm cable. TuneBase Direct also allows you to take calls hands free with one touch of a button.

Both TuneBase FM and TuneBase Direct are case compatible, meaning you don’t have to remove your iPod or iPhone from its case and both have ‘Made for iPod’ and ‘Works with iPhone’ certification.
