

WIRELESS CHARGING MADE SMART

Meet the demands of your growing business with a smart, scalable, self-healing solution for wireless charging in offices and venues. Large scale deployments are made simple via an installer app, while Chargifi's cloud management platform enables real-time monitoring of multiple charging spots across various locations.

Studies show that venues offering smart wireless charging see correlations with customer loyalty and boosted revenue*

THE FUTURE IS WIRELESS

WHY CHARGIFI

Chargifi's Cloud management platform works with **Belkin wireless charging spots** to enable smart, mass deployment of wireless charging. Smart wireless charging opens up opportunities to create more efficiency in any workspace and an enhanced customer experience in cafés or hotel lobbies.

Valuable Insights

Receive real-time analytics on a user's session, location and dwell time through an intuitive dashboard with **Analyze.**

Peace of Mind

Manage monitors the health of your charging network remotely or through an MSP. Many issues and predictive maintenance are resolved over-the-air.

Smart Integrations

Connect works with existing software & apps to turn behavioral insights, such as a user's temperature or lighting preference, into personalized guest experiences.

Wireless Charging for Business

Deploy and Forget

Real-time alerts ensure you detect problems before your clients do

Self-Healing

Maximize reliability and reduce expensive servicing costs

User Insights

Actionable insights about how customers/users are engaging with your locations

Grows With You

Cloud management makes scaling simplified, whether it is adding more charging spots to an existing location, or expanding your charging network into multiple locations.
